

ARMY INDEPENDENT LOGISTICIAN ASSESSMENT
For
Transportation Coordinator's Automated Information for Movement System II
(TC-AIMS II)

1. This office, as the Army Independent Logistician, supports a Type Classification and Full Materiel Release of Transportation Coordinator's Automated Information for Movement System II (TC-AIMS II).
2. TC-AIMS II provides a critical link in providing information to support the Joint Deployment Process. TC-AIMS II enables commanders and supporting movement coordinators to rapidly plan, coordinate, and execute unit deployment in either a crisis action or deliberate planning mode. TC-AIMS II provides vital in-transit visibility information to Combatant Commanders through its interfaces with C2 systems and the Global Transportation Network
3. PM Transportation Information Systems is continuing to address all prerequisites for type classification and materiel release. Based on review of appropriate logistics documentation, TC-AIMS II is effective and ~~suitable for fielding~~.
